

Science Week Home Challenge

The theme this year is **Food: Different by Design**

Task: Create a product (model/poster/video/your choice) demonstrating your research or experiment that connects to the food theme.

Some project ideas...

Does the colour of food or drinks affect whether we like them?
Where are the most germs found?
Does music influence plant growth?

There are many more food investigations you could do if you search for food investigations/experiments online or come up with your own idea.

All entrants will go in the draw for a Science Week prize and receive a participation certificate.

Bring your submissions to school by Monday 16 August.
