ROBOGALS CANBERRA

Inspiring
tomorrow's
engineers, today

OUR IMPACT

340 WORKSHOPS

7,000+ GIRLS

11,800+ STUDENTS

Robogals
Canberra Asia Pacific

WHO WE ARE

WORKSHOPS

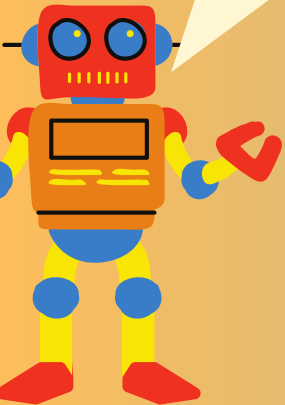

Robogals Canberra is a student-run, non-profit organisation who help empower the next generation of engineers.

We come from a wide range of expertise from engineering to music to law and are all united under the cause of gender equity in STEM.

We focus on encouraging girls from primary to secondary school to explore an interest, as well as cultivate self-confidence, in these areas.

Women make up **28%** of the STEM workforce in Australia, with **only 14%** in engineering. Help us increase those numbers!

Australian Mathematical Sciences Institute, 2014

Biology Workshop

Capillary Action
in Plants

Cool Instant
Snow

CO2 & Our
Environment

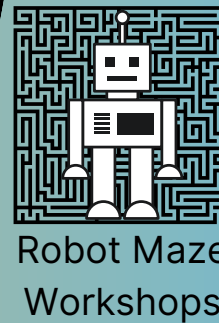

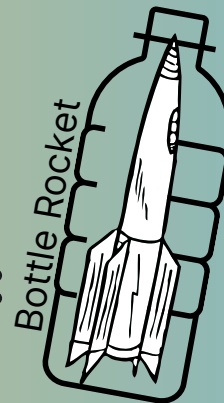

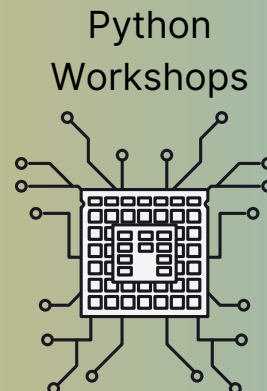

Arduino Workshop

C+ Programming

And More!

Our workshops are aimed to employ a range of technical skills to solve engineering-style problems. Whilst developing skills such as computational thinking, communication, teamwork and critical thinking

Suitable for Years 5-10

Duration: 1-2 hours

Can cater for one class at a time
